01 · PROJECT OVERVIEW

Project overview

Candy World has already built a strong reputation through its storefront, events, and in-person sales, supported by **more than 2,000 Google reviews**.

> **Our goal:** bring that same success online with a website that makes it easier for customers to discover your business, purchase treats, and book your services.

This project focuses on three main areas:

Custom Website Redesign
A modern, mobile-friendly website with simplified navigation and less unnecessary content.

Online Shopping
Connecting your new website to Shopify so customers can securely purchase products online.

SEO
Improving your website's search visibility to help more potential customers discover Candy World.

02 · WEBSITE SCOPE & INCLUDED PAGES

Website scope & included pages

Your website will be custom-designed to stay **simple, organized, and easy to navigate**. All pages are responsive across desktop, tablet, and mobile.

MAIN NAVIGATION

Home | **Shop** | **Services** (Book the Truck / Catering) | **Contact**

Page 1 — Home

Introduces Candy World and guides visitors toward **shopping, booking, or visiting your storefront**.

- Hero banner with products, business introduction, and clear action buttons
- Featured treats with product images and shopping options
- Services overview highlighting food truck bookings and catering
- About Candy World and your business story
- Customer reviews and Google rating
- Storefront location, hours, and contact information; social links and footer

Page 2 — Shop

One convenient page for **both food products and merchandise**.

- Categories for drinks, treats, candy apples, and merchandise
- Product images, descriptions, and pricing
- Add to Cart for eligible products, with a shopping cart and **secure Shopify checkout**
- Shipping or pickup options based on product availability
- Mobile-friendly product browsing

Page 3 — Services

The Services menu links to **two dedicated subpages**, keeping services organized without overwhelming visitors.

Book the Truck

- Service introduction
- Packages, pricing, and inclusions
- Event photos
- Booking inquiry form
- FAQs on deposits, travel, and event requirements

Catering

- Service introduction
- Treats, drinks, and catering packages
- Product images and pricing
- Minimum order requirements
- Pickup and delivery information
- Catering inquiry form

Page 4 — Contact

A simple, convenient place for customers to connect.

- Contact form
- Storefront address and map
- Business hours
- Click-to-call phone number and social media links

Also included — footer pages: Privacy & Settings (privacy practices, data collection, cookie preferences) and **Accessibility** (accessibility features and how to request assistance). Linked in the footer of every page to keep the main navigation uncluttered. A link to your About information is also in the footer.

03 · SHOPIFY PAYMENT INTEGRATION

Shopify payment integration

Rather than replacing your existing Shopify system, we'll **connect it to your redesigned website**. Customers get a new shopping experience while Shopify keeps handling the essential e-commerce functions.

Included

- Shopify Storefront API integration
- Product and shopping cart connectivity
- **Secure Shopify-hosted checkout**
- Existing payment methods, where supported
- Inventory and product availability synchronization
- Shipping and tax configuration based on your approved settings
- Checkout testing before launch

Shopify stays your platform for managing orders, inventory, and payments. MigsFlow handles the custom website design and ongoing website updates.

04 · SEO & ONLINE VISIBILITY

SEO & online visibility

One-time SEO & technical integration setup: $1,300

A beautiful website matters, but customers also need to find it. Our technical developer will strengthen your website's search foundation so Google can better understand your products, location, and services.

SEO Research & Planning

- Review of your current website's SEO
- Keyword research for products, storefront, food truck, and catering
- Page structure planned around relevant searches

Technical & On-Page SEO

- Optimized page titles and descriptions
- Proper headings and search-friendly structure
- Image descriptions and optimization
- Mobile performance improvements
- Indexing and sitemap setup
- Local business structured data
- Redirect planning for existing URLs

Local SEO

- Google Business Profile review
- Recommendations to improve local search visibility
- Consistent business information across the site
- Existing Google reviews integrated into the website

Analytics & Tracking

- Google Analytics 4 setup or verification
- Google Search Console setup or verification
- Tracking for online purchases and customer inquiries
- Final SEO checks before launch

Important: SEO is a long-term investment. These improvements build a stronger foundation for online visibility, but **immediate rankings, traffic, and sales cannot be guaranteed**. Ongoing SEO management is not included in the one-time setup.

05 · PROJECT TIMELINE

Project timeline

Estimated completion: 4–6 weeks

1. **Planning & SEO Research**
   Review your business goals and research keywords and website structure.
2. **Onboarding & Content Collection**
   Collect your logo, photos, product details, menus, pricing, packages, and the account access listed in section 07.
3. **Website Design & Development**
   Build your custom website and online shopping experience.
4. **Shopify & Technical Integration**
   Connect products, checkout, shipping, and necessary backend systems.
5. **SEO Implementation & Testing**
   Finalize SEO, configure analytics, test forms and checkout, and review mobile performance.
6. **Review & Launch**
   Complete final revisions, receive approval, and launch your website.

Some phases overlap to keep the project moving efficiently. **The timeline begins once the project is approved, initial payments are received, and the required content and access are available.**

06 · PRICING & PAYMENT BREAKDOWN

Pricing & payment breakdown

Website design & maintenance

$125/month MigsFlow Monthly Website Plan

- Custom website design and development
- Main pages and Services subpages outlined above, plus Privacy & Settings and Accessibility footer pages
- Website hosting
- **Unlimited routine website updates**, including text and image changes
- Ongoing website maintenance and support

A **6-month minimum** applies, then month-to-month. Major redesigns, new functionality, and additional pages are quoted separately.

SEO & backend integration

$1,300 one-time setup
Includes the SEO and technical integration services outlined in this proposal.

Your payment schedule

PAYMENT	AMOUNT	DUE
Website startup fee	**$350**	To begin
SEO & integration deposit (50%)	**$650**	To begin
Remaining SEO & integration balance (50%)	**$650**	At launch
Website subscription	**$125/month**	Begins after launch

$1,000
Total to get started

$650
Remaining one-time payment at launch

$125/mo
Ongoing subscription after launch

The total one-time startup and technical setup cost is **$1,650**, paid in two stages. Your existing Shopify subscription, transaction fees, shipping charges, and any required third-party services are separate from the pricing above.

07 · WHAT WE'LL NEED FROM YOU

What we'll need from you

To keep everything running smoothly and avoid delays, we'll need a few things **before development begins**.

Branding & Website Content

- Business logo and brand assets
- High-quality product and storefront photos
- Videos you'd like featured
- Updated business information and contact details
- Finalized product descriptions, menus, and pricing
- Confirmed food truck and catering packages

Account Access

- Shopify collaborator access
- Google Analytics and Search Console access, if existing
- Google Business Profile access, if needed
- Primary service areas for food truck bookings and catering
- Any existing marketing or advertising accounts relevant to the project

Shipping & online orders

You don't need every shipping cost or technical detail figured out to get started. We'll work together to **establish a shipping strategy before your online store goes live**, reviewing the available options and how they can be configured in Shopify. It helps to know:

- Which treats can safely be shipped
- Approximate product and packaging dimensions and weights
- Whether you have a preferred shipping carrier
- Where you'd like to ship your products
- Whether you plan to offer pickup or local delivery
- Any special packaging or handling requirements

We'll also explain the difference between **flat-rate and calculated shipping** so you can choose what works best for your business.

> **You won't be expected to figure out the technical shipping setup on your own.** We'll guide you through the options, but **final shipping prices, policies, and fulfillment decisions need your approval before launch.**

08 · READY TO GET STARTED?

Ready to get started?

Once you're ready to move forward, we'll send over your **service agreement and initial invoice**. After those are completed, we'll begin onboarding, collect your website content, and start building your new online experience.

We're excited about the opportunity to help Candy World expand its online presence and make it easier for customers to shop, connect, and book your services.
